Table of Contents

Preface 1

Chapter 1: Drawing Shapes in Canvas 7

- Introduction 7
- Graphics with 2D canvas 8
- Starting from basic shapes 14
- Layering rectangles to create the flag of Greece 16
- Creating shapes using paths 19
- Creating complex shapes 24
- Adding more vertices 31
- Overlapping shapes to create other shapes 35

Chapter 2: Advanced Drawing in Canvas 37

- Introduction 37
- Drawing arcs 37
- Drawing curves with a control point 40
- Creating a Bezier curve 42
- Integrating images into our art 46
- Drawing with text 50
- Understanding pixel manipulation 54

Chapter 3: Creating Cartesian-based Graphs 61

- Introduction 61
- Building a bar chart from scratch 62
- Spreading data in a scatter chart 68
- Building line charts 76
- Creating the flying brick chart (waterfall chart) 84
- Building a candlestick chart (stock chart) 92

Chapter 4: Let's Curve Things Up 105
Introduction 105
Building a bubble chart 105
Creating a pie chart 114
Using a doughnut chart to show relationships 119
Leveraging a radar 123
Structuring a tree chart 129

Chapter 5: Getting Out of the Box 137
Introduction 137
Going through a funnel (a pyramid chart) 138
Revisiting lines: making the line chart interactive 145
Tree mapping and recursiveness 150
Adding user interaction into tree mapping 158
Making an interactive click meter 162

Chapter 6: Bringing Static Things to Life 167
Introduction 167
Stacking graphical layers 168
Moving to an OOP perspective 177
Animating independent layers 187
Adding an interactive legend 193
Creating a context-aware legend 198

Chapter 7: Depending on the Open Source Sphere 205
Introduction 205
Animating a gauge meter (jqPlot) 206
Creating an animated 3D chart (canvas3DGraph) 211
Charting over time (flotJS) 217
Building a clock with RaphaelJS 222
Making a sunburst chart with InfoVis 229

Chapter 8: Playing with Google Charts 239
Introduction 239
Getting started with a pie chart 239
Creating charts using the ChartWrapper 245
Changing data source to Google Spreadsheet 248
Customizing the chart properties with an options object 252
Adding a dashboard to charts 254

Chapter 9: Using Google Maps 259
Introduction 259
Creating a geographic chart with Google Visualization API 260
Obtaining a Google API key 265

Building a Google map 267
Adding markers and events 272
Customizing controls and overlapping maps 275
Redesigning maps using styles 280

Chapter 10: Maps in Action 287
Introduction 287
Connecting a Twitter feed to a Google map 288
Building an advanced interactive marker 293
Adding multiple tweets into an InfoWindow bubble 297
Customizing the look and feel of markers 303
Final project: building a live itinerary 310

Index 325
